

The 10-Point Growth Systems Checklist

Score your growing business across the 10 areas that determine whether enquiries turn into customers, or quietly disappear.

Most growing businesses are already investing in visibility, such as a website, a Google listing and social media posts. But visibility without a working process to capture and convert those visitors is wasted effort.

This checklist covers the 10 areas where enquiries most commonly leak away before becoming customers. Work through each point honestly, write notes, then use your total score to decide what to fix first.

HOW TO SCORE

Score 1 if this is clearly in place and working.

Score 0 if it is missing, inconsistent, hard to prove, or only partly done.

Be honest. This checklist is most useful when it shows the real gaps.

YOUR TOTAL SCORE

Add up your 10 points, then use the score guide on the final page.

/ 10

1

Lead Capture

Score ☐ 0 ☐ 1

Does your website have a visible, easy-to-use contact form, booking button, or enquiry route above the fold, without requiring a phone call?

Check: Open your homepage on a mobile device. Can a new visitor see how to enquire within the first 5 seconds, without scrolling?

Red flag: Your only contact route is a phone number, a contact page buried in the footer, or a form that takes more than 60 seconds to find and complete.

Notes:

2

Follow-Up Speed

Score ☐ 0 ☐ 1

Do new enquiries receive a response within one hour, either automatically or from a team member?

Check: Submit a test enquiry through your own website. Time how long it takes to receive any response.

Red flag: You rely on someone manually checking an inbox. Enquiries sent outside working hours receive nothing until the next working day.

Notes:

3

CRM and Lead Tracking

Score ☐ 0 ☐ 1

Is every enquiry, regardless of where it came from, logged in one place with a clear next action and follow-up date attached to it?

Check: Right now, without going through your phone or inbox, can you name how many open enquiries you have and when each one was last followed up?

Red flag: Leads live across WhatsApp, email, Instagram DMs, phone notes and spreadsheets. There is no single view of your pipeline.

Notes:

4

Email Marketing

Score ☐ 0 ☐ 1

Do you have an email list of past customers and enquiries, and do you send to it at least once a month with something useful or relevant?

Check: When did you last send an email to your list? If you cannot remember, or if you do not have a list, score 0.

Red flag: Your last email to customers was seasonal, promotional only, or more than 90 days ago. You have no welcome email for new enquiries.

Notes:

5

Website Conversion

Score ☐ 0 ☐ 1

Does every key page have one clear, visible call to action, and does a first-time visitor immediately understand who you help and what they should do next?

Check: Ask someone unfamiliar with your business to open your homepage on mobile. Ask them: what does this business do, and what should I do next? If they hesitate, score 0.

Red flag: Your homepage has multiple competing CTAs, or no CTA above the fold. The copy describes what you do but not who it is for or why they should act.

Notes:

6

Social Media Consistency

Score ☐ 0 ☐ 1

Are you posting at least weekly, does your bio include a working link to your website or booking page, and do your posts include a clear next step?

Check: Look at your last 10 posts. How many included a CTA, a link, or a prompt to enquire or book? If fewer than half did, score 0.

Red flag: Posts are irregular, your bio link is missing or broken, and content builds awareness without turning interest into an enquiry.

Notes:

7

Google Business Profile

Score ☐ 0 ☐ 1

Is your **Google Business Profile** verified, complete and actively managed with accurate hours, services, photos, reviews and a website link?

Check: Search your own business name on Google. Does the listing appear? Is every section completed? When was the last photo added? When did you last reply to a review?

Red flag: Your listing is unverified, has missing sections, shows outdated hours, or has unanswered reviews from the last 90 days.

Notes:

8

Reviews and Social Proof

Score ☐ 0 ☐ 1

Do you have a repeatable process for asking satisfied customers to leave a review, not just when you remember to ask?

Check: When did your last review arrive? Is there a gap of more than 30 days between recent reviews? Do you reply to every review, positive and negative?

Red flag: Reviews arrive only when customers choose to leave them unprompted. You have no follow-up message, no consistent asking habit, or unanswered negative reviews.

Notes:

9

Customer Retention

Score ☐ 0 ☐ 1

Do you have a planned process to re-engage past customers as a regular part of how you run the business, not just when you have something to promote?

Check: How many customers from 6 to 12 months ago have returned or re-enquired in the last 90 days? If you do not know, or if the answer is very few, score 0.

Red flag: Past customers hear from you only during promotions. There is no regular touchpoint, rebooking nudge, review request, or win-back campaign.

Notes:

10

Booking Journey

Score ☐ 0 ☐ 1

Is the journey from first seeing your business to completing a booking or enquiry simple, fast and friction-free, especially on mobile?

Check: On a mobile device, go through the complete booking or enquiry journey as a new customer would. Count every tap, page load and form field. If it takes more than 4 major steps or more than 2 minutes, score 0.

Red flag: The journey requires a phone call, back-and-forth email, account registration, or more than 3 pages before the next step is clear.

Notes:

Your score summary

TOTAL SCORE**/ 10****LOWEST SCORING AREA****FIRST FIX TO FOCUS ON****8-10: Strong foundations.**

Your core process is in place. The opportunity now is to sharpen the weakest points and focus on retention and referrals to grow revenue without increasing spend.

5-7: Good base, clear gaps.

You have some of the right pieces, but they are not all connected. Prioritise the lowest-scoring areas first.

3-4: Significant leakage.

Multiple stages of your growth process are broken or missing. Fixing even two or three points can have a fast, visible impact on enquiries and bookings.

0-2: Growth is blocked at the foundations.

The visibility you have built is not being converted. Before spending more on marketing, fix the capture and follow-up process so new attention has somewhere to go.

Questions to ask after scoring your business

1. Where are enquiries most likely slipping away?
2. Which gap would be easiest to fix first?
3. What would improve response speed?
4. What would make the booking journey simpler?
5. What could bring past customers back?
